

# Know Your India

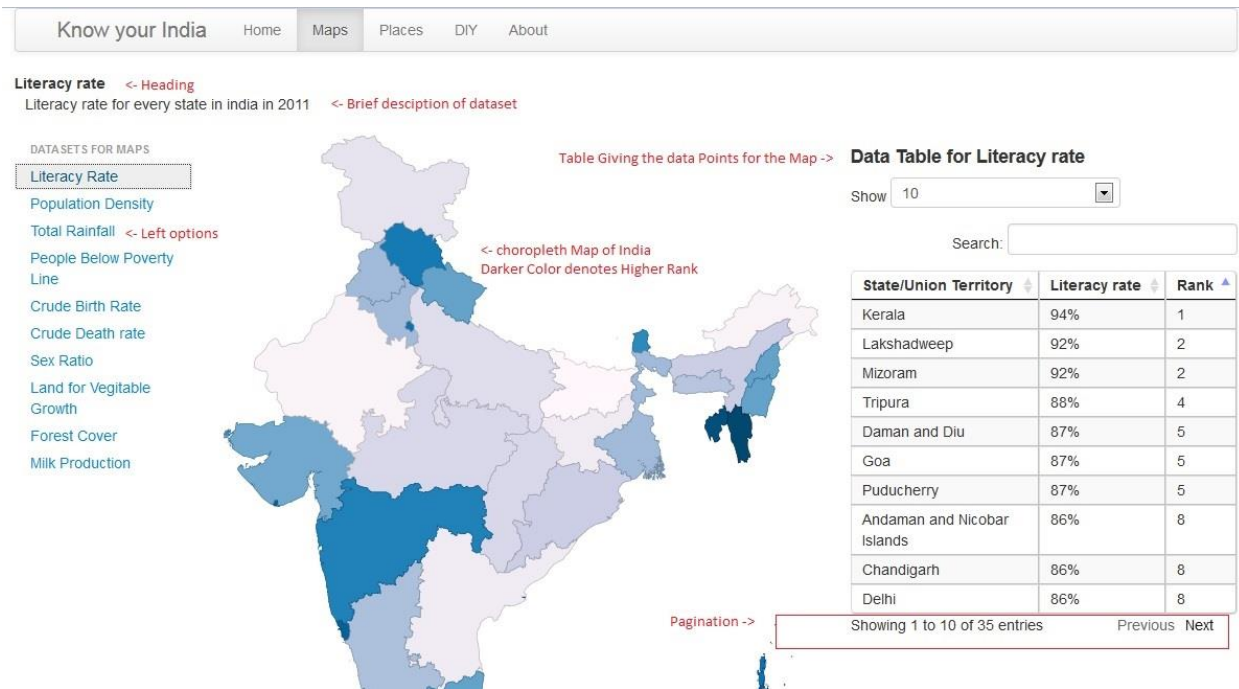

## Home Screen

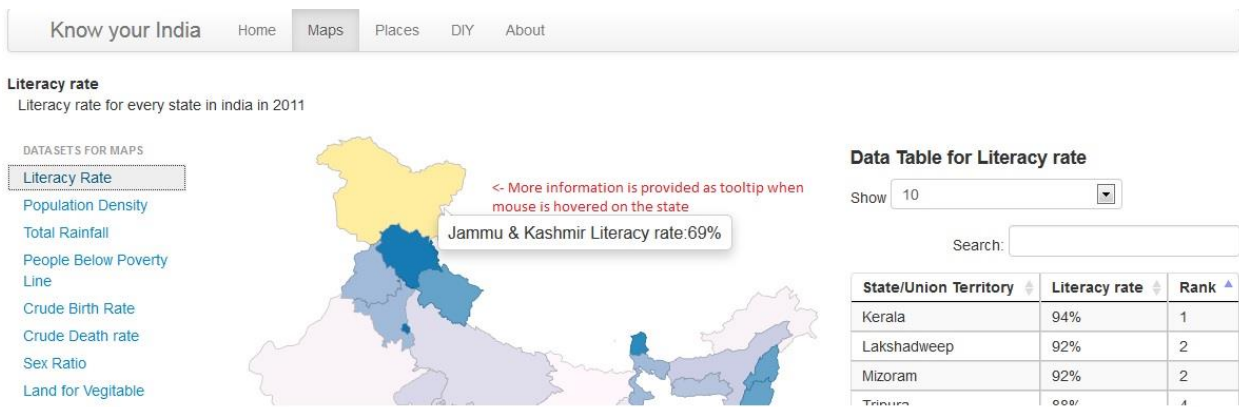

We can either use the menus in the title bar or click on the “Explore” button to see the maps

## Map Screen: Used to visualize datasets

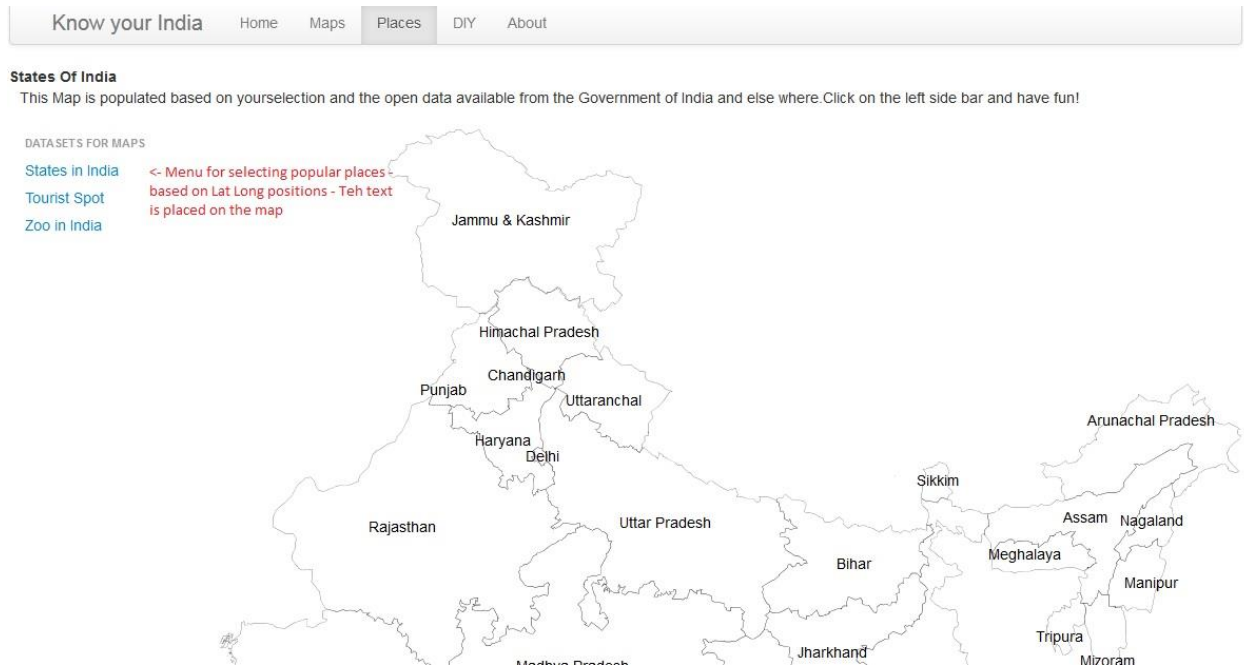

When the user hovers on the state – A nice tool tip comes in and gives more information.

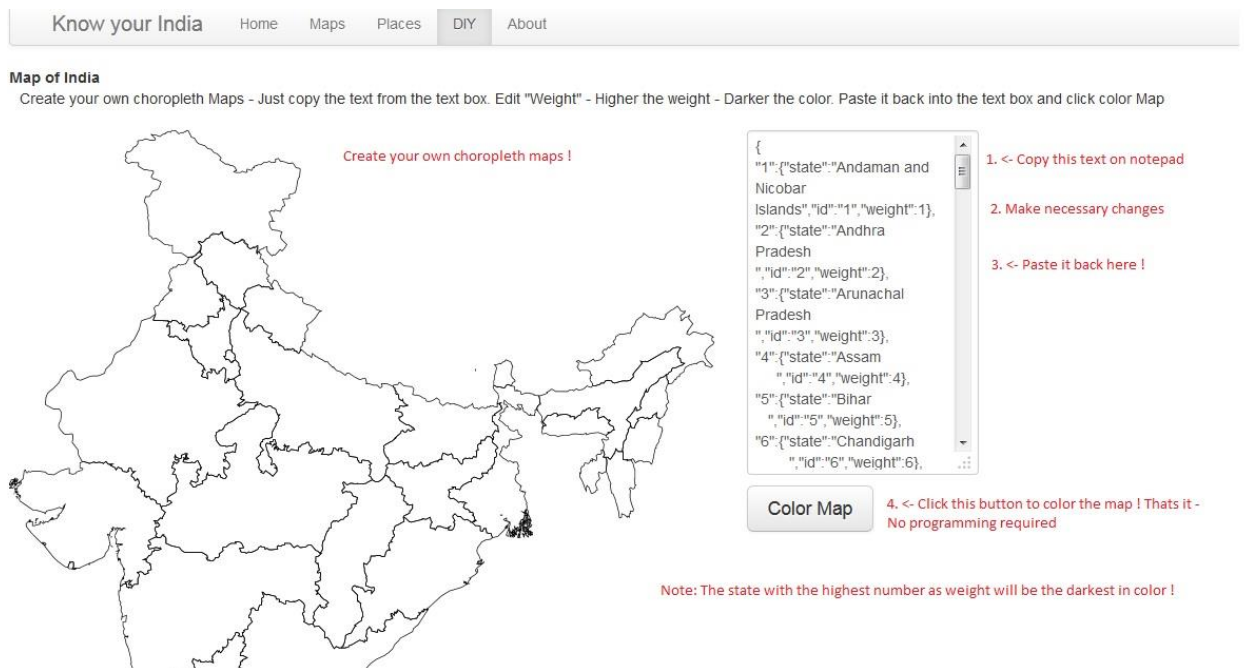

**Places Screen:** Used to get a general idea of places listed. It uses the Latitude and Longitude of a place to put text over it!

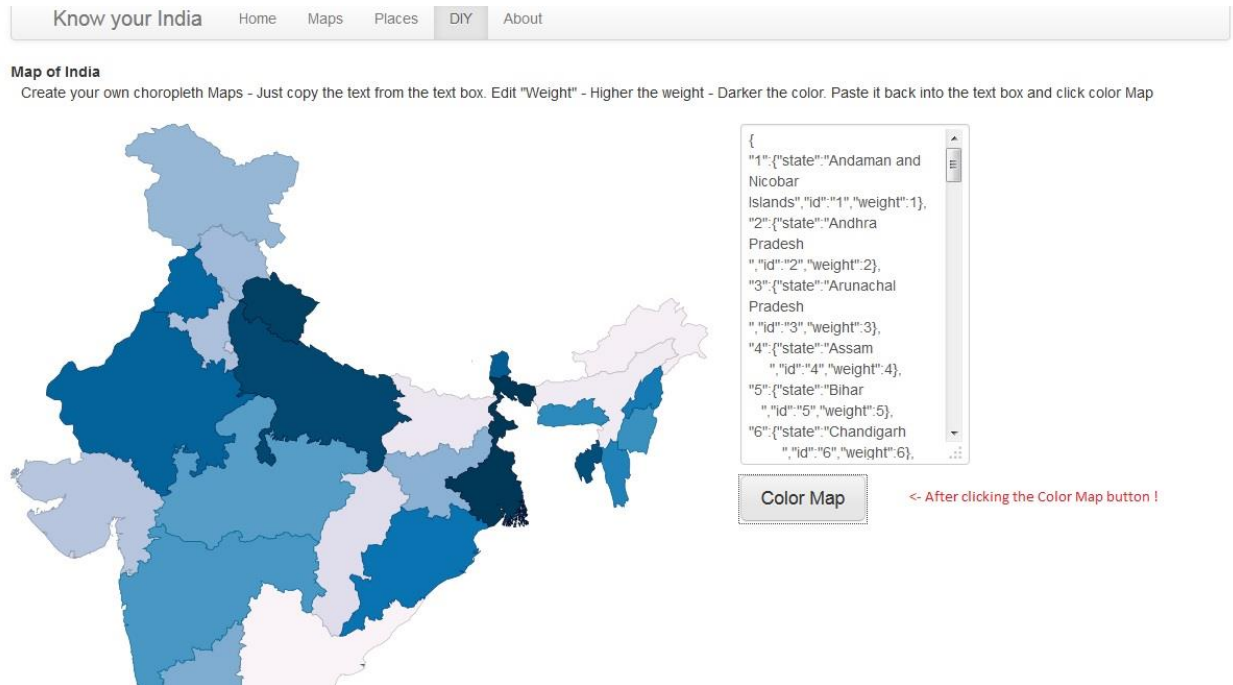

**DIY Screen:** Used to generate your own choropleth!

Copy the text from the text box – Change the weights (From 1 to 35). Paste it back and click “Color Map”. Instant choropleth is ready!

Resultt :

**About Page:** Gives information about authors – libraries used etc.
